#### 2024 POCKET PRICE GUIDE

Volume 28

## **The Ones That Matter**

elcome to the 2024 SCM Pocket Price Guide. For this year's edition, we have leveraged the expertise of our team of auction analysts and marque experts to bring you the smartest value guide in the collector-car market. We asked each of our contributors to identify the models that make up the bulk of today's auction action, cars that are both interesting to collectors and exciting to bidders. This clean-sheet approach yielded more than 1,000 valuations covering the breadth of the market and reflecting those vehicles that we report on every month in the pages of Sports Car Market.

We hope you use the Pocket Price Guide as a starting point for your research. Our price ranges are meant to get you "in the ballpark," but we would be remiss if we did not also encourage you to dig deeper. There is more pricing information at hand today than ever before, from online sources such as the SCM Platinum Auction Database to sales results published by auction companies themselves. With online auctions happening around the clock, "current" prices can change almost as rapidly as in the stock market.

With easier access to information, we have seen condition and specification having a greater impact on sales prices. Buyers have been willing to pay up for the best-quality cars. In certain segments, the market has begun moving more quickly. Some models have experienced sharp increases in sold prices, with every auction result topping the one previous, only to slide back in a matter of months when demand is satisfied. These trends just reinforce the need to do your homework in deciding how much to spend for any collector car.

That said, although our vehicles may be financial instruments, they are first and foremost cars. If you enjoy your collector cars, whether by driving or showing them or just admiring them in your garage, you have earned returns on your investment no matter the price. — Jeff Sabatini, Editor-in-Chief, Sports Car Market

Values Increase. Our Rates Stay the Same.

Whether insuring a priceless historic vehicle or a weekend cruiser, <u>no one</u> knows more about insuring collector cars than Grundy!

Agreed Value. Unlimited Mileage. No Deductible.

## **2024 Pocket Price Guide**

#### **Production Numbers:**

Numbers listed are the best available but may include estimates.

**n/a** production number not available

inc. Number is included above in the larger production

number for the model

#### **Investment Grade:**

Note: This is not a value-appreciation guide. Rather, it is an overall ranking of the desirability of the car, regardless of current market conditions.

A Grade: Cars that will always have a following and bring strong money when they are offered for sale. They embody the attributes of style, performance, historical significance, rarity and competition history that typify first-rank collectibles. Examples are the Ferrari 250 GT SWB, the Mercedes-Benz 300SL and the 1963 Chevrolet Corvette Z06.

**B Grade:** Cars that have something special about them, often technical innovation, style or competition provenance — but not usually all three. They were generally produced in far larger numbers than the A-tier cars. Examples include the Lamborghini Miura and the Ferrari 246 GT Dino.

C Grade: Cars that have some inherent interest but had few special or desirable characteristics. Examples include the Lamborghini Jalpa and the Triumph TR4A.

D Grade: Cars that had the potential to be interesting but failed to be successful in the collector-car marketplace, often due to design, engineering or styling flaws. The Ferrari 400 series and first-generation Mazda RX-7 are examples.

## **Shifting Into Reverse**

A market correction has affected all but a few blue-chip muscle cars

ike many other segments of the market, muscle-car values have mostly reverted to pre-pandemic levels. It was bound to happen, but the combination of inflation, higher interest rates and economic uncertainty have brought those lofty numbers down quickly. The effect of inflation is especially insidious since those pre-pandemic values are worth much less in real dollars.

As always, some "blue chip" vehicles remain strong. For instance, 1970 Chevy LS6 Chevelles continue to power through the headwinds. Some other GM muscle, such as the 1968–70 Pontiac GTO (espe-

cially The Judge models) and 1970–74 Pontiac Firebirds are exhibiting renewed interest. The "Winged Warrior" Dodge Daytona and Plymouth Superbird likewise show resilience, as do the 1970–71 E-body Plymouth 'Cuda and Dodge Challenger, but only those with 440 Six Pack or 426 Hemi power. The 1969–70 Ford Cobra Jet and Super Cobra Jet Mustangs continue to ride the small wave they caught in 2022. Overall, however, even low miles or rarity are no guarantee of an above-average sale in today's muscle-car market.

With any storm there is a silver lining, and for buyers the market is now in their favor. A buyer's market typically means less inventory to choose from, but with patience the right vehicle can be found. For the first time in a few years prices should remain realistic for most cars in this category and are unlikely to plummet further. This can be a great opportunity to add that dream muscle machine to your garage. —**Tom Glatch**

## **Keep Calm and Motor On**

The traditional English-sports-car market is healthy, but flat

t was in the years following World War II that the "British invasion" of sporting cars changed the face of the car scene in the U.S., and it was about 1980 when production of many of those relatively affordable and cherished cars came to an end.

The best-known models of the genre include Jaguar's XK series and E-type, "Big Healeys" and Austin-Healey Sprites, Triumph TRs and, of course, MG T-series cars, followed by MGAs and MGBs. All are still plentiful and all still command loyal followings. That high interest translates to

good parts availability and strong technical support through club networks. It's a healthy segment for now, although the last year has seen a mostly flat market.

On the other hand, generations with contemporary memories of these cars when they were new are dwindling at an increasing pace. The traditional British sports cars will never be aspirational cars for younger generations, and that means the number of future caretakers is likewise shrinking.

These competing factors mean that for the short term, the market is likely to remain healthy, but values are not headed up. Therefore, if you're tempted to indulge in ownership of one of these rolling historical artifacts, now is the time. Prices may begin trending downward in the medium term (say, in five-plus years), tempting some to wait, but that same trend will likely negatively affect parts availability and also mean a diminished support network. Then who ya gonna call? Pull the trigger, write the check, and drive the English sports car you've always wanted. — **Reid Trummel**

### **Mixed Signals in Porscheland**

Next Gen growth but 356s and long-hood 911s are flat

orsche values have encountered crosscurrents over the past 12 months, with 1949-65 356s and 1964-73 "long-hood" 911s at best staying even. Some models have declined, even 4-cam 356 Carreras; 356 Speedsters and 1973-74 911 Carrera RS models seem to be the exception, having dropped from their 2015-17 highs, but recently recovered.

Millennials and Gen Xers kept the 1989-and-later 911s on an uptrend. 1989-94 964s and 1995-98 993s have

been strong, the former aided by being the base model for Singer's "reimagined" classic 911s. Even the long-forlorn 996s, decried by some for their ovaloid headlights and plastic interiors, caught an updraft as the most affordable way into a 911, especially Turbos.

Many special 911 variants have been stronger; 1984 SC/RSs, 1995 993 RSs, 2007–08 997.1 and 2010–11 997.2 GT3 RSs, and 997.2 GT3 RS 4.0s have moved up. The 1992 964 RSs, 2016 GT3 RSs, and 2019 GT3 RSs have been steady, but they were built in larger numbers than other RS models. Both GT2 RSs, 997.2 and 991.1, have been stronger. Special models like Sport Classics and late-model Speedsters have been steady or up. Porsche's new 2023 GT3 RS and Cayman GT4 RS had resale prices substantially above MSRP during their delivery periods.

Cayman GT4s and Boxster Spyders have increased slowly, while base models are steady or depreciating slowly, making them attractive entry-level cars. Ditto for 914s, 924s, 944s, and 968s, where only the special models (914/6, 944 Turbo Cup, 968 Club Sport, and 968 Turbo S) are exceeding inflation. Panameras, Macans and Cayennes are basically used cars, except for the Cayenne S Transsyberia that caught the interest of the off-road crowd. As we always note, Porsches with extremely low mileage or those with blue or green paint sell higher, sometimes substantially so. — **Prescott Kelly** 

Nothing Ordinary Mostly Extraordinary

#### **Horses For Courses**

#### The Ferrari market is changing as it evolves

ollector cars are challenging to value. Ferraris just feed steroids to the problem. Million-dollar restorations, hundred-thousand-dollar option packages, race history, non-original configuration, Classiche Certification and deferred maintenance all influence the spread between high and low.

The classic-Ferrari segment has shown little movement over the past few years. When exceptional examples change hands (rarely) they tend to sell above the "last sale"; however, lesser-quality examples must be heavily discounted. While the days of buying a classic Ferrari as an investment

may be nearing their end, owning one is still on many bucket lists.

Options for entry-level \$100,000 Ferraris are getting thinner. Among those models that Boomers and Gen Xers grew up with, deferred maintenance has made many less-expensive examples into poor choices, a situation that will not get better with time.

This has led buyers toward newer cars; however, Ferrari has manipulated the cost of recent models with custom builds and expensive options. Such escalation in prices supports the value of used models and means that most late-model Ferraris have fared better than they should in the used-car marketplace, despite substantial numbers being available. Manual-transmission cars and special-series models have separated themselves into a different league, bringing exceptional prices.

Ferrari supercars are their own segment. They were expensive when new and only become more so as they age. It recently looked like you couldn't pay too much for one — you could only buy too soon. The current market is still strong, but recent buyers can no longer expect to flip a car at a profit. — **Steve Ahlgrim**

### **Rising Interest**

#### Next Gen Japanese collectibles have room to run

or much of the past 50 years, the Toyota 2000GT has been the only Japanese car that Westerners dared to describe as collectible. Beginning in the mid-1990s and continuing for two decades, the collector-car market witnessed a meteoric rise in 2000GT values, with the first seven-figure sale coming in 2013. During this same time frame, little else in the Japanese segment showed significant gains in both interest and value.

Fast-forward to the current decade, where the market has experienced rapidly

escalating prices for immaculate examples of Next Gen Japanese cars, now considered legitimate collectibles. These cars include R33 and R34 variants of the Nissan Skyline GT-R, the A80 Toyota Supra, Lexus LFA, and first-generation Acura NSX. It is particularly interesting to note that the sharp escalation in prices for all these cars occurred nearly simultaneously, beginning in mid-to-late 2021. Along with this, a small number of classic Japanese cars, most notably pristine examples of Series I Datsun 240Zs, have seen a sharp growth in interest among collectors of all ages.

The market for Next Gen Japanese cars should remain strong over the next few years with younger Gen X and Millennial collectors becoming more entrenched in the hobby. While there remains much enthusiasm for Skyline GT-Rs, prices may cool with several thousand of each series having been produced. Lower-production Next Gen models such as the Japanese-market Honda NSX-R and Lexus LFA will likely show the greatest appreciation. — *Mark R. Brinker* 

# Southern California Classic Car Buyers! Finder's Fees & Quick Payment & No BS! One Car or Collections; Consignments Considered

We are Always Looking for Primarily Rare, Unusual or Simply Honest & Original Stock European or American Classic Cars. Premium Industry Prices Paid for Original Low Mileage Cars with Documentation! Any Marque or Type Considered. Distance No Object but California Cars Preferred. We Want American Muscle Cars, European & American Sports Cars or Luxury Sedans, Convertibles or Coupes, Station Wagons, Trucks, Customs and Restomods & even Motorcycles!

### **Historic Bargains**

Amidst a generational shift, "Les Grandes Marques Françaises" offer unprecedented value

ight now, if you want a couple of vintage Louis Vuitton traveling cases to put in the back of your 1930s Delage or Delahaye, they'll likely cost you as much as the car. Traditional buyers of the renowned French marques — including Delahaye and Delage, plus Bugatti, Talbot-Lago and Hispano-Suiza (yes, this nominally Spanish automaker designed and produced most of its cars in France) — are either dead or too old to care. With rare exceptions, their children and grandchildren have not been interested.

So, if you look hard, you can find a Delahaye 2-door saloon in Europe for \$75k. Spend less than \$10k to get it home and it will most likely be surprisingly reliable and give you years of pleasure. Now, a Bugatti or Hispano could result in a world of expensive pain. Part of what's going on with the market is that such potential pain has wrongly rubbed off onto the likes of Delage, Delahaye and Talbot. These cars have had a huge correction during the past three years and are now selling at prices that make serious financial sense.

Bugatti and Hispano are still very much prestigious automobiles and cost serious money. Unless you are unlucky enough to buy a Delage, Delahaye or Talbot with a cracked block, they will deliver thousands of miles of carefree motoring. Your local shop should even be able to look after them. They are handmade, rare and unusual. If you push the budget to \$300k, they are even very beautiful, with coachwork that will put the heads of passersby on a swivel. These cars are extremely unlikely to drop any further in value. Buy one now before everyone else wakes up. — **Toby Ross**

#### **MEMBERSHIP HAS ITS BENEFITS**

For 35 years, Sports Car Market has been the world's leading collector car magazine. In addition to 12 monthly printed issues, with your SCM membership you get immediate access to the current digital issue, as well as exclusive print publications such as the Pocket Price Guide and specialty guides devoted to Monterey Car Week, Spring Auctions, Arizona Auction Week, Restorations and Concours. These are exclusive ONLY for members of SCM, and not available anywhere else. Members also get advance notice and priority registration to SCM 1000 Tours.
